---

I am a full-stack developer proficient in multiple technologies including the React ecosystem, Next.js, Node.js, .Net Core web API & MVC, SQL and other modern development tools. I have deployed multiple web applications, several of which are actively in use. I am a highly organized and adaptive learner, I excel at navigating complex systems of information and applying effective learning strategies to master new concepts. I approach challenges with a problem-solving mindset informed by philosophical thinking, which I apply across both technical and personal domains.
